

INFOPRO SDK Version 1.1

This SDK intended for ease software development for Infopro devices. The SDK provides functionality to establish the "device-to-client software" data interchange.

Features:

- Simplify network data interchange, no need of direct TCP/IP communication programming.
- For C++ programmers provides a simple all in one class "Infopro".
- Both Windows and Linux support.
- Higher-level abstraction via `infopro_lib.dll` for Windows platform. The only six simple functions exported for the full-featured Infopro access.
- Delphi 7 example, based on stdcall DLL. The Dynamic Link Library provides possibility to incorporate it into a wide range of projects based on various programming languages.
- NODE.JS support provides JSON data format.

Intended to Projects like:

- Integration of Infopro devices into Traffic Management Software.
- Stand alone data-collection server software.
- Road traffic controllers direct data supply.
- Custom projects in fields of Traffic control / Data collection / Road maintenance.
